CHOICE ROSES

\$1.50 per dozen in the following varieties:

American Beauty Rose

Bush Roses

American Beauty. The well known red rose.

Edward Mawley. A wonderfully rich, velvety crimson color. Large free bloomer. Strong grower.

Etoile de France. A lovely shade of clear velvety red crimson. Very fragrant.

Edward Mawley

Frau Karl Druschki, or White American Beauty. This grand rose has become renowned as the very highest type of its class, and the best snow-white ever introduced. It is an extraordinarily strong grower and has the vigor and hardiness of an oak. Its magnificent flowers are nothing less than glorious, immense in size and produced with great freedom. This rose is in such favor that we have not yet been able to supply the demand.

General McArthur. One of the finest of red roses. Free bloomer, strong grower.

Gruss an Teplitz. The reddest of roses. Fiery scarlet, shading to velvety crimson. Blooms most profusely; grows free and vigorous.

J. B. Clark. The color is unique among roses, being deep scarlet shaded blackish-crimson, with rich bloom like a plum. Flowers are large and beautifully formed. Awarded the gold medal, N. R. S.

Jon. J. L. Mock. One of the strongest and the most excellent growing hybrid Teas ever produced. Blooms carmine changing to imperial pink; large, full and of fine form; highly perfumed. Fine for cut flowers.

J. B. Clark

George Elger. A lovely little golden yellow rose. Like all of its class, it is free of growth, free in bloom, with small, glossy foliage produced in profusion. The dainty little pointed yellow buds open into pretty, symmetrical little roses. Will prove a very popular corsage variety. Is grown in quantity now for this purpose.

General Jacqueminot. An old popular variety; color brilliant crimson; large and effective. One more of the old ones that will always please.

Kaisserine Augusta Victoria. Pure white with shadings of primrose white. A grand all-white rose. Fine for cut flowers. Strong grower and free bloomer. Buds and bloom perfect form.

Killarney Pink. Deep shell pink with long, pointed buds. Excellent for cut flowers.

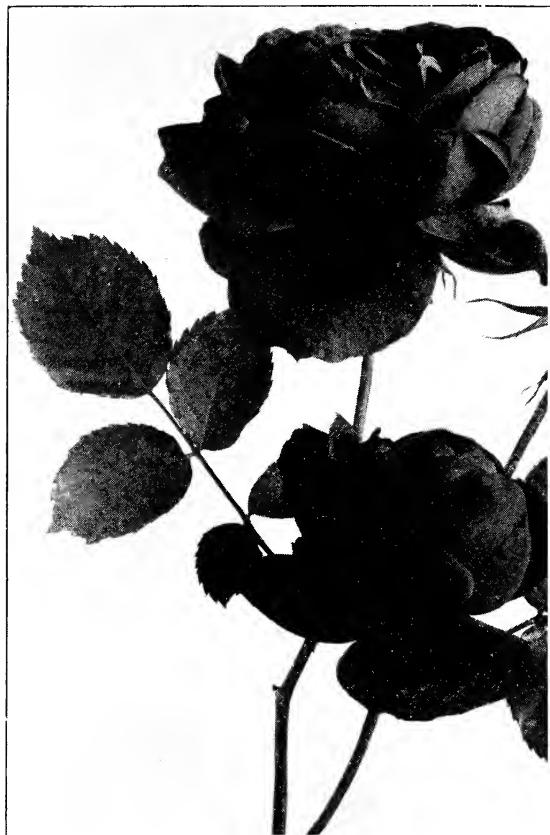

Lady Hillingdon. Has a long, slender, pointed bud of brilliant golden yellow; blooms continuously. Good for cut flowers.

La Detroit. A most beautiful rose. Strong grower, free bloomer; foliage rich and glossy. Shell-pink shading to soft rose. Very fragrant. Fine for cut flowers.

Mrs. A. R. Wadell. Similar to the Los Angeles rose. A delightfully refined rose with ornamental foliage; large open flowers of deep apricot color; buds long and pointed; of delicate apricot fragrance; constant bloomer and fine for cut flowers.

Mme. Cecil Brunner. The best of the miniature roses. Bright rose shaded salmon-pink. An elegant little rose. A perfect little gem. Free grower and constant bloomer. Very fine for corsage or shower bouquets.

Papa Gontier. Rosy-crimson. Fine long bud, free and strong. One of the old ones that is always in demand.

Ulrich Brunner

Lady Ursula. Color a most beautiful shade of flesh-pink, of great substance and good form. Strong grower and free bloomer. Fine for cut flowers. Delicately perfumed.

Mme. Leon Pain. Flesh-pink, center yellowish orange; large, full and free.

Maman Cochet. One of the most wonderful of roses; clear, rich pink, shaded with salmon yellow. Large, full and of perfect form; free blooming, strong grower, with handsome foliage. One of the best for cut flowers.

Mme. Caroline Testout. The rose that made Portland famous. Clear, bright, satiny pink. Flowers large; full and free bloomer. Extremely showy. Strong grower.

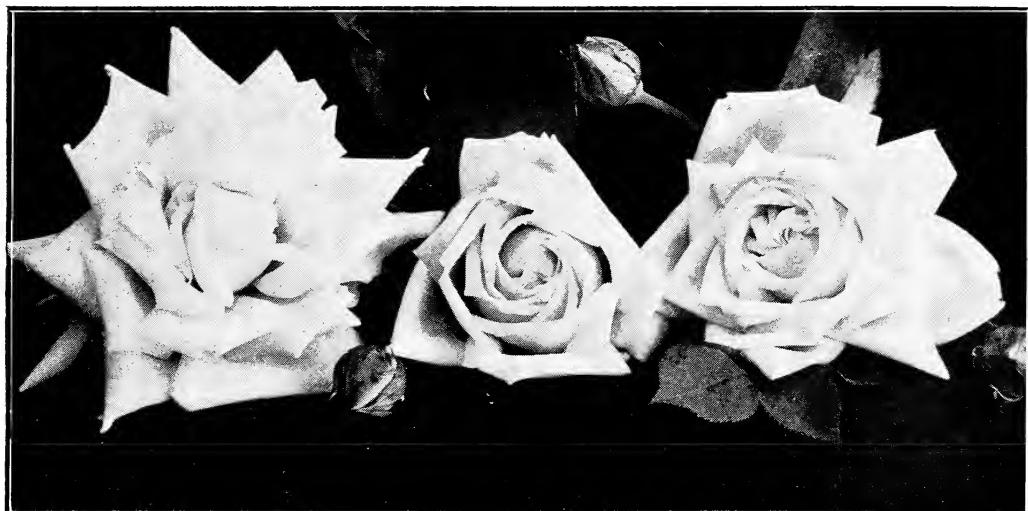

Winnie Davis

Paul Neyron. The largest rose in cultivation. A handsome, upright grower, producing an immense flower at the end of every long, stiff stem. Color, a deep rose; a free bloomer. Good for cut flowers.

Radiance. This variety will be in very heavy demand as soon as it is known. The globular, perfect flowers on long, stiff canes are a sight long to be remembered. The flowers open out as nearly perfect as any rose we have ever grown. Color, rose-pink, and very fragrant. Strong grower, fine foliage. We take much pleasure in offering this splendid rose to our friends this year. One of the best for cut flowers.

Sunburst. By far the very best perfect yellow rose. A perfect grower and free bloomer. The color is orange-copper and golden-yellow; edge of petals lighter; all intense shades, extremely striking in effect. It is the yellowest of all roses in the everblooming class.

Kaiserine Augusta Victoria

Ragged Robin, or Gloire des Rosamones.

The best rose for hedges. Deep crimson, semi-double, free and constant bloomer.

Ulrich Brunner. The best cherry red rose in cultivation. Extremely strong grower, fine long stems, perfect foliage; fine form and most effective in the garden.

White Maman Cochet. This nearly all white rose takes first place in the cut flower list. The outside petals tinged with pink give the flower a charming effect. Strong grower and a free bloomer. One of our best sellers.

Winnie Davis. Brilliant apricot-pink with reflex lighter tints, making a very handsome semi-double, graceful rose.

Climbing Roses

Cherokee Pink. About the same in form as the White Cherokee. Color bright, clear pink.

Cherokee White. A splendid sort for covering arbors, verandas, etc.; its leaves are smooth and glossy, as if varnished; flowers single white.

Climbing Cecil Brunner. This is an extremely remarkable rose on account of its very strong growing qualities, its clean, abundant and vigorous foliage. It is a remarkably free bloomer and is in bloom nearly the year round. The flowers are identical with the well-known bush variety. Bright, clear pink; baby size flowers so popular with June brides.

Climbing Caroline Testout. A sport from the bush of the same name; bloom identical with its parent. The color is a solid cerise pink and does not fade. The flower is large and fragrant.

Climbing Papa Gontier. Same as the bush variety in color, fragrance and form. One of the best climbers and would be planted more if better known. We recommend this rose very highly.

Climbing Kaiserine Augusta Victoria. Same as the bush variety, except a climber.

Lamarque. The best white climber where an abundance of foliage is wanted as well as good, clear white flowers. A free bloomer and strong grower.

Gold of Ophir. Color combination of copper, carmine and salmon. A most beautiful combination. One of the popular climbers in Southern California.

White Cherokee

Reine Marie Henrietta. Rich and glowing red, retaining color in heat of summer. About our best climbing red.

Marechal Neil. Immense, deep golden-yellow; very fragrant climber.

White Banksia. Small, white flowers in great profusion, making one of our most popular climbers.

Yellow Banksia. Same as the white, except the color is clear yellow.

Deciduous and Evergreen Trees and Shrubs

Deciduous Trees

Arizona Ash. 50c and 75c.

Plantanus orientalis. "Plane Tree." "European Sycamore." The bark of this ornamental shade tree is very attractive, which is creamy white mottled by darker blotches, which gives the tree a very characteristic appearance, especially in winter. Has a large head of dense bright green rather large foliage, similar to the maple leaf, but larger. A rapid grower. 50c and 75c.

Hardy Flowering Shrubs

Lagerstroemia indica rosea. "Pink Crape Myrtle." Here we have a summer flowering shrub which is also very beautiful in the fall months just after the blooming period and before the leaves fall in the winter. At this time the leaves take on tints which are exceptionally rare in foliage. The colors are from green to yellow, orange, pink, copper, apricot and red. A strong growing shrub producing an abundance of soft fringed flowers, blooming continuously during spring and summer. 15c, 25c, 50c, and 75c.

Lippia. "Lemon Verbena." A rapid growing shrub with very fragrant lemon scented foliage and bearing upright clusters of small white flowers. 15c.

Punica. "Flowering Pomegranate." A large shrub or small tree with beautiful orange-red double flowers. 15c.

Spirea. "Bridal Wreath." The old-fashioned garden shrub. The white flowers are borne on long, graceful, drooping single stems, producing a wreath-like effect. 15c.

Berberis Thunbergii. "Japanese Barberry." By far the most beautiful of the medium growing deciduous shrubs. When used in the foreground in landscape planting it adds a touch of color long to be remembered. The inner bark and wood is yellow. In spring the new leaves are very light green, shiny and clean, and in the fall and winter assume a splendid carnival coloring, ranging from light and dark green to pale and golden yellow, pale and deep pink, red, crimson, apricot, and coppery tints. 15c, 25c, and 50c.

Syringa. The old-fashioned white flowered syringa. 15c.

Diervilla hybrida. "Weigela." The pink flowered shrub too well known to need description. 15c.

Evergreen Trees

Acacia Floribunda. A fast, upright growing, ever-blooming tree. Excellent for tall, broad hedges or as single specimens. A wealth of small round yellow flowers. \$1.00, \$1.25 and \$1.50.

Spirea Van Houttei

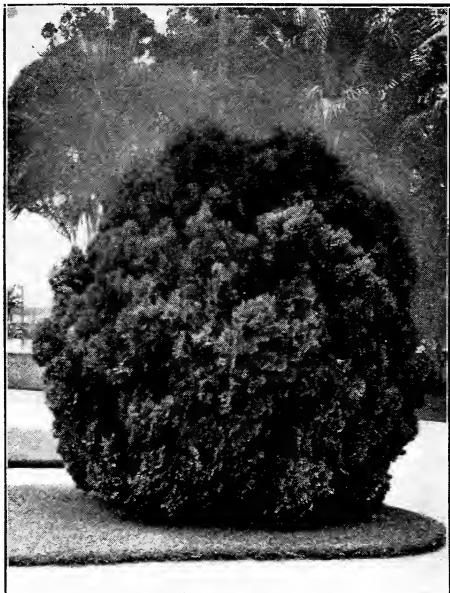

Cedrus deodara. "Himalayan Cedar." The best large evergreen tree we grow; foliage bluish green with wide spreading branches, and very distinct from most other conifers. Will stand extreme drought and cold. One of the most ornamental for the lawn and excellent for avenue or driveway. 25c, 75c, \$1.00, \$2.50, \$3.00, \$3.50.

Sequoia sempervirens. "California Redwood." A handsome, clean, upright evergreen. Excellent as a single specimen or for avenues or driveways. 25c, 50c and 75c.

Cupressus sempervirens. "Italian Cypress." A tall, slender tree. Will grow forty to fifty feet in height and two to three feet in diameter. We have the best strain of Italian cypress in Southern California, and all our trees are grown from cuttings from one original tree, thus insuring a uniform type. We sell many thousands of these trees every year. 15c and 25c.

Evergreen Shrubs

Abelia Grandiflora. "Hybrid Abelia." One of the hardiest and free flowering evergreen shrubs. It is in bloom nearly every month in the year. Flowers tube like, light rose in summer and in winter taking on reddish and bronze shades. Foliage dark and glossy green. Used as hedges or single specimens and for landscape gardens. One of the prettiest shrubs. 15c.

Thuya Orientalis Aurea Nana
Golden Arborvitae

Arborvitae (Thuya). **Arborvitae orientalis aurea nana.** The genuine "Berkman's Dwarf Evergolden Arborvitae." The largest seller we have on our list, having already booked for the 1921 season over 50,000 of this one plant, which we ship from the Pacific to the Atlantic Coast and the Gulf of Mexico, including Cuba. The branches are compact, flattened and retain their golden color throughout the year. One of the easiest shrubs to grow. A dwarf and symmetrical. Used for single specimens or hedges; also tub plants for porch decorations. Will stand shearing, if desired. 15c, 25c, and 50c.

Choisya. "Mexican Orange." This beautiful shrub is different from most shrubs on account of its dense bright green, glossy and always clean, aromatically scented foliage. Produces clusters of white orange-like, fragrant flowers. A handsome shrub worthy of greater popularity. Grows large and suitable for backgrounds or masses. 15c and 25c.

Cotoneaster horizontalis. This ornamental shrub is excellent for foregrounds. Is low growing of a spreading habit. Horizontal branches, leaves small, glossy, rich green, turning to yellow golden, reddish and coppery tones in the fall and winter. Flowers in spring pinkish white and red berries in fall and winter. 25c.

Cotoneaster microphylla. A medium sized upright growing shrub with tiny grayish, glossy green foliage, producing a beautiful contrast with the blackish, slender stems. White flowers in spring, followed with numerous pinkish berries in fall and winter. 15c, 25c, 50c, 75c, \$1.00 and \$1.25.

Cotoneaster panosa. Branches single and gracefully drooping. Leaves satiny grayish green. An excellent variety of the Cotoneaster family. White flowers in spring, and in fall and winter the wreath like stems bear single bright red berries and leaves, alternately, from base to tip. 15c.

Cotoneaster Microphylla

Crataegus pyracantha Ielandi. "Burning Bush." A compact evergreen shrub of upright, sturdy habit. A large shrub or small tree. Foliage a dark satiny, rich green, with clusters of white flowers in the spring, followed in the fall and winter with immense clusters of bright orange colored berries. This shrub is the most attractive of the Crataegus family. Will stand shearing. 15c and 50c.

Crataegus crenulata. "Burning Bush." A tall growing shrub with an abundance of small evergreen, glossy, handsome foliage. Bears numerous small white flowers in spring, followed in the fall and winter with a wealth of bright red berries about the size and color of English holly. Very effective for decoration. Fast grower. Will stand shearing. 15c and 50c.

Euonymus japonica. "Evergreen Euonymus." Excellent for hedges or single specimens; also for backgrounds. Will stand shearing. Leaves somewhat smaller than orange leaves, glossy, dense and dark green. Rapid upright grower. 15c, 25c, 50c and 75c.

Euonymus japonica argenteo variegata. "Silvery-Marginated Euonymus." Green leaves are marked with white. Upright grower. 15c and 25c.

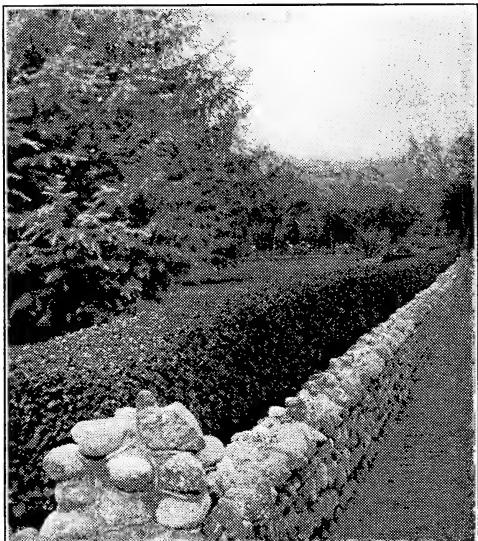

Euonymus japonica aurea variegata. "Golden Variegated Euonymus." Leaves golden yellow in center, dark green around edges. Strong grower. 15c, 25c and 50c.

Euonymus japonica viridi-variegata. "Due de Anjou." Leaves green with markings of pale green and pale yellow. 15c, 25c and 50c.

Euonymus pulchellus. "Small-leaved Euonymus." A dwarf shrub of great merit. Resembling the Japanese and English box, but much more hardy and will withstand extreme heat and cold. Can be sheared to any shape or form and excellent for low borders, small hedges or formal specimens. Also used for tub specimens. Leaves small, compact, glossy and rich green. 15c, 25c, 50c, and 75c.

Laurus cerasus. "English or Cherry Laurel." A very large shrub of globular form, which shape it attains without shearing. Very compact, large deep green, glossy leaves. 25c and 75c.

Leptospermum laevigatum. "Australian Tea Tree." Large spreading shrub, with gracefully drooping habit. Foliage small, grayish green, with silky young shoots. Suitable for backgrounds or masses. Also used for hedges and single specimens. Will stand shearing. One of the better class shrubs. 25c, 50c and \$1.25.

Ligustrum Ovalifolium

Ligustrum ovalifolium. "California Privet." One of the best hedge plants. Medium sized deep green leaves and erect, compact branches. Also used for a low wind brake. A very rapid grower, and will stand shearing. Of easy culture. 15c, 25c, 50c, 75c, \$1.00 and \$1.25.

Ligustrum. "Golden Privet." Same as above except with golden variegated leaves. Very attractive and excellent for adding a touch of color to landscape work. 25c, 75c, \$1.00 and \$1.25.

Buxus japonica. "Japanese Box." A beautiful, dwarf, dense, compact, slow-growing shrub with small, dark green, shiny leaves. Used for low borders, single specimens or tubs. Will not stand extreme heat. 15c, 25c, 50c and 75c.

Nandina Domestica. "Japanese Nandina." This beautiful, upright grower, similar to the bamboo, is one of the best dwarfish shrubs for California. The new, tender growth is prettily tinged with red, changing to deep glossy green at maturity. The foliage is evergreen and graceful at all times, changing to golden red and coppery tones in the winter. In summer it is covered with upright clusters of numerous small white flowers and in winter with upright clusters of small red berries. 25c, 50c, 75c.

Thuya Orientalis Pyramidalis

Pittosporum tobira. This is one of the shrubs that is most widely used for landscape work and takes the place of the shrub Coprosma or "Ice plant," which burns in the hot interior or will freeze in extreme cold. Very effective for masses, hedges or single specimens. Winter flowering and fragrant. Forms a dense globular head. Leaves glossy deep green. 15c, 25c, 50c, 75c, \$1.00, \$1.25.

Thuya orientalis Pyramidalis. Of upright pyramid habit. Cedar-like bright green foliage. Very fine for large formal effect. 15c.

Viburnum tinus. "Laurestinus" Winter flowering shrub sometimes called the Winter Lilac. A large shrub with medium-sized, compact, satiny, bright green leaves. A profusion of clusters of flesh-colored flowers, in the fall and winter. Excellent as single specimens, masses or hedges. Strong grower. 15c, 25c, 50c, 75c, \$1.00, \$1.25.

Group of Palms

Palms, Yuccas, Bamboos

Chamaerops excelsa. "Windmill Palm." This is the best palm for parking, especially for narrow spaces. Trunk tall, slim and very hairy. Leaves fan-shaped and not as large as other varieties of the fan palms and therefore better adapted for parking. Will stand more frost than any other palm. 15c, 25c, 50c, 75c, \$1.00.

Kentia Palm. The best palm for indoor culture. Will thrive in complete shade but will not stand the hot rays of the sun. Is easy to grow but does better in a pot inclined to be too small or when roots seem to be potbound. Spineless palms with pinnate leaves. This is the palm so extensively used for decoration in the largest and finest hotels in the world as well as in private homes. 75c.

Phoenix Canariensis. "Ornamental Date Palm." This is the most widely planted palm in California for lawn, avenue or tub specimens. A strong and rapid grower. 25c, 50c, 75c, \$1.00, \$1.25, \$1.50, \$2.00, \$2.50, \$3.00, \$3.50, \$5.00, \$6.00.

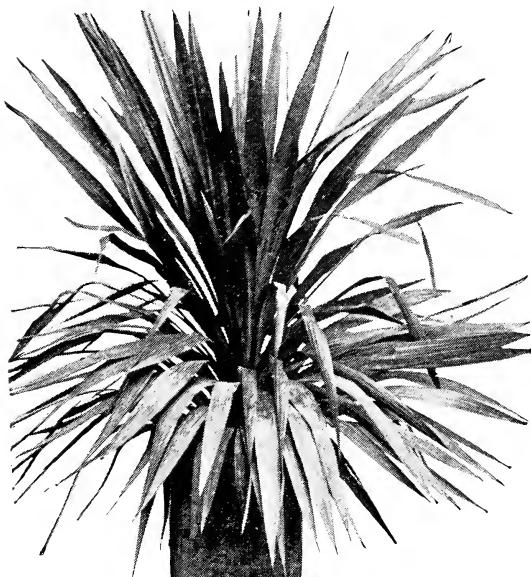

Washingtonia filifera. "California Fan Palm." The characteristic palm of California. Trunk large, drooping fan-shaped leaves. The lower leaves drop down and rest against the trunk forming a skirt. 15c, 25c, 50c, 75c, \$1.00, \$1.25, \$1.50.

Dracaena indivisa. Tropical appearance with yucca like leaves that droop gracefully. A very decorative plant for lawns, drives or walks, and when small are extensively used for pots, tubs or window boxes. 15c, 25c, 50c, 75c, \$1.00, \$1.25, \$1.50.

Washingtonia robusta. The best of the Fan palms. Tall slender trunk. Leaves darker green and more robust than the filifera. 15c, 25c, 75c, \$1.00, \$1.25, \$1.50.

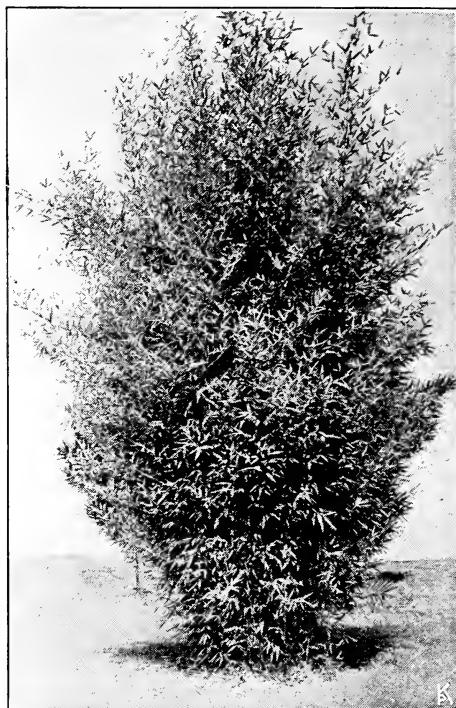

Chamaerops Excelsa

Yucca Pendula

Yucca pendula. Valuable for landscape planting, or specimen plants in tubs for porch decoration. Dark green, narrow, drooping leaves. 25c, 50c, 75c.

Bambusa striata. "Dwarf Golden Bamboo." The best of the dwarf golden variety, leaves striped green and yellow. \$1.25, \$1.50.

Bamboo

Vines, Trailers, and Foliage Plants

Ampelopsis veitchii. "Japan or Boston Ivy." The leaves change from a green in the summer to gorgeous tints of yellow, gold, pink, scarlet and red in the fall and drop off a short time in the winter. Will cling to any material. 15c, 25c, 50c, 75c, \$1.00, \$1.25.

Bougainvillea sanderiana. During the flowering period, which covers most of the season, the gorgeous display of dark magenta flowers is a scene never to be forgotten. This is one of the most beautiful flowering climbers in California. Requires a very warm situation in the full sun and will not stand much frost. 25c, 50c, 75c, \$1.00, \$1.25.

Ficus Repens. "Fig Vine." The most popular evergreen climbing vine for covering walls, buildings, etc. Leaves small, deep green. Will cling close to stone, brick, wire, glass, wood or cloth. 15c, 25c, 50c, 75c, \$1.00, \$1.25.

Jasminum grandiflora. "Royal Jasmine." The best white and most fragrant jas- mine. Nearly erect-growing, the branches drooping, will climb if sup- ported. Very strong grower. Much grown in Europe for perfumery. 15c.

Jasminum humile. "Italian Yellow Jas- mine." This early flowering yellow jas- mine is in bloom in early spring or winter. It is about one of the first flowers that appear in that season. Strong grower and free bloomer. Also used for hedges. 15c.

Hedera helix. "English Ivy." One of the best climbers for a dense evergreen cov- ering. 15c.

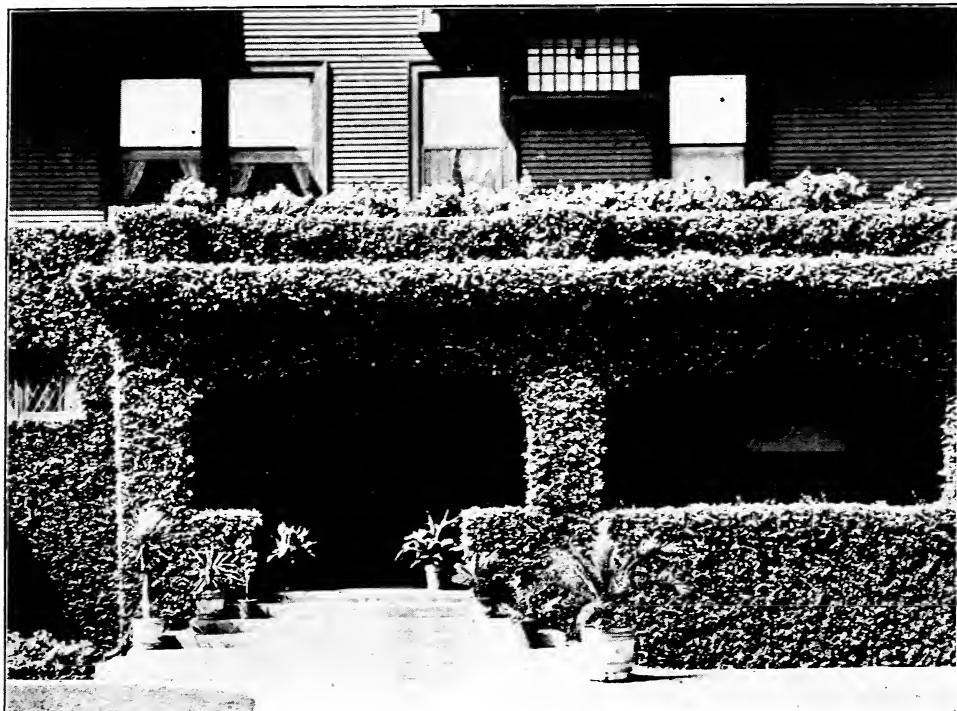

Ipomoea. "Moonflower." Resembling the morning glory but larger. Color heav- enly blue. Perennial. Remarkable for easy culture, quick growth and beau- tiful flowers. Will produce shade the first season. Popular plants for cov- ering verandas and screening unsightly objects. 15c, 25c.

Lonicera. "Honeysuckle." The best ever- green honeysuckle. Flowers white, changing to yellow, often purplish out- side. Deliciously fragrant. Should be sheared or trimmed out every winter, if a nice, clean, green effect is wanted. One of the best climbers for porches, arbors, fences, also extensively used for hedges, or for covering banks. 15c, 25c.

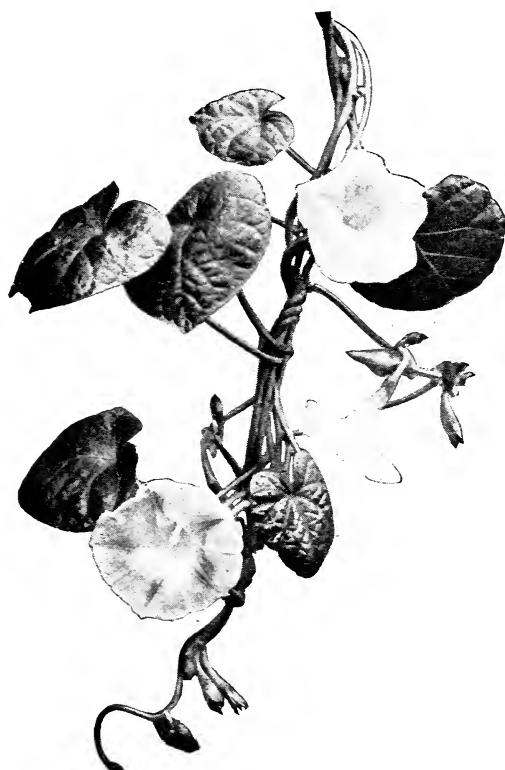

Vinca major. "Periwinkle or Trailing Myrtle." This is one of the commonest and best plants for covering the ground in deep shade, especially under trees and in cemeteries. Hardy, shiny evergreen foliage and large blue flowers. Also used for hanging baskets and window boxes. 15c, 25c.

Vinca major. variegata. A variegated form of the above. The leaves are mar- gined with creamy white. 15c, 25c.

Wistaria multijuga. Lilac purple flowers. Loose-clustered wistaria with dark green foliage, is one of the best of hardy climbers. 75c, \$1.25.

Ficus Repens—Climbing Fig

Moon Flower

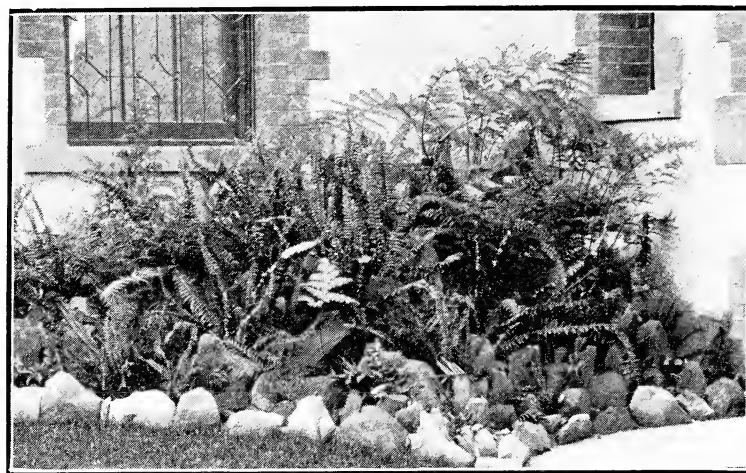

Muehlenbeckia complexia. "Wire" Vine.
Rapid growing vine, with blackish, wiry, long, slender stems with tiny deep green leaves resembling the maidenhair fern, and is very often used as a cut greens to make up with cut roses, carnations and other flowers, for which purpose it is very effective. Excellent for covering trellises, stone walls, fences, trees, etc. 15c. 25c.

Boston Fern

Ferns

Asparagus plumosus. Lace-like foliage. Will grow bushy in a pot but in the open ground will send up long sprays which are valuable for cut greens. 15c. 25c.

A Bed of Ferns

Asparagus sprengeri. Long and slender, drooping glossy green branches, small whitish fragrant flowers, followed by coral red berries. One of the most popular basket and window box or porch decorative plants. Easily grown. 25c, 50c, 75c.

Nephrolepsis bostoniensis. "Boston Fern." Without doubt the most valuable ornamental foliage plant for house and conservatory decoration. Graceful drooping habit. Shift into larger pots as the plant grows and this will soon produce a specimen plant. Give plenty of water in summer. A plant in good condition can be used for several years, during the summer on the veranda and in the house during the winter. 15c, 25c, 50c, 75c, \$1.25.

Nephrolepsis exaltata. "Sword Fern." Same as above except upright grower. 15c, 25c, 50c, \$1.25.

Carnations

Carnations. (*Dianthus Caryophyllus*) Because of the clove-like fragrance, large flowers, and free blooming quality of our carnations they are always in great demand. Assorted colors. We offer only the best sorts. -25c per dozen.

Flowering Plants

Geranium. "Ivy Geranium." Pink, trailing habit. Suitable for hanging baskets, window boxes, rockeries, etc. 15c, 25c.

Hydrangea Otaksa. Very ornamental shrub with large round clusters of pinkish flowers and large, shiny, bright green leaves. Hardy. Should be pruned in fall or early spring for best results. During the summer a liberal supply of water should be given. A liberal supply of peat mixed with garden soil is the best and will produce deep green leaves and a deeper pink flowers. 15c, 25c, 50c, 75c.

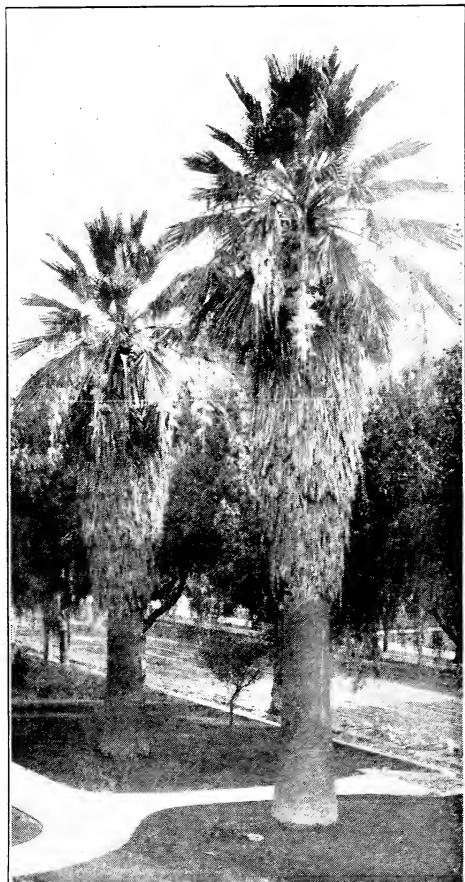

Heliotrope. Violet flowers in terminal forked clusters of vanilla-like fragrance. Is a warmth and sun loving plant, and requires plenty of water and good drainage. 15c.

Carnation

Wistaria

Washingtonia Robusta

Violets. We offer the Princess of Wales Violet. The most fragrant, long stem, large flower and best color. The violet bed does best in an eastern exposure. The soil should be as loose as possible and when planting the plants should not be pressed into the soil, but just covered to the proper depth. The bed should always be mulched with rich manure and over this a mulch of old leaves or similar matter. This will prevent the soil from packing and the very best results will be obtained. To grow fine large violetts with long stems the bed must not be allowed to pack. 25c per dozen.

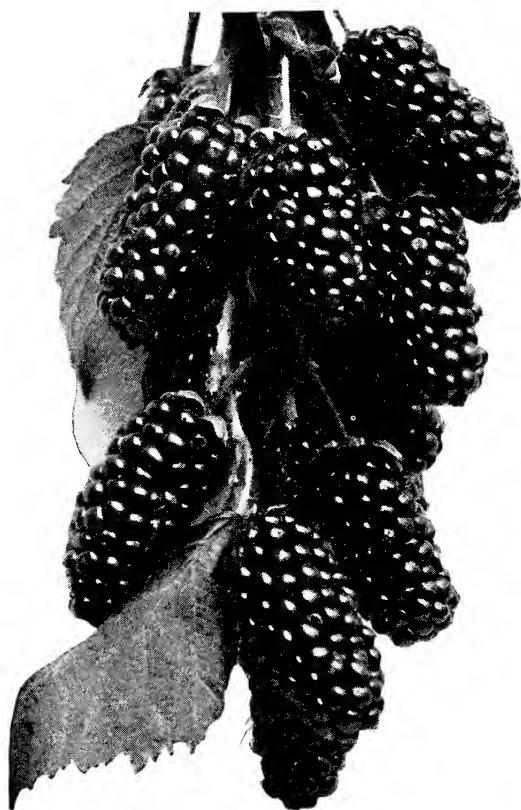

Weeping Lantana. Very effective results can be obtained in planting the weeping lantana with Asparagus Sprengerii and variegated Vinca in baskets or window boxes. Of weeping or drooping habit. Numerous small clusters, about the size of a five-cent coin, of shell pink flowers. Each cluster containing about fifteen or twenty compact flowers. 15c, 25c.

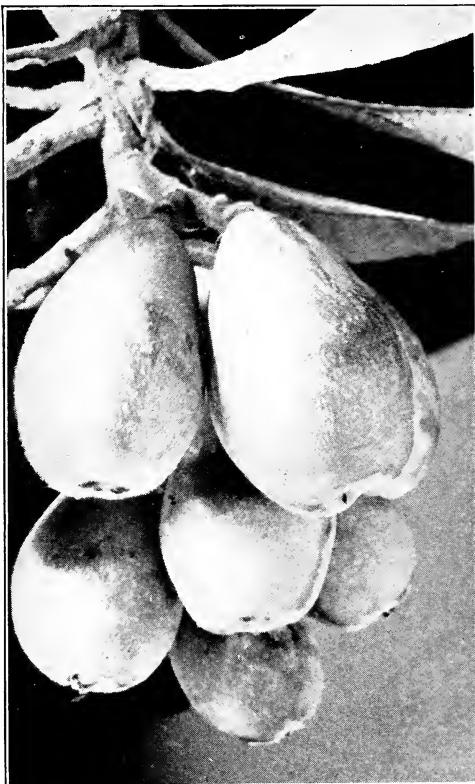

Shasta Daisy

Shasta Daisy. The improved large Shasta Daisy. White flowers with yellow centers. Long stems fine for cut flowers. 15c per dozen

Customers wanting plants in large quantities should send us a complete list, and we will make a special price. It may also be possible that we can be of service in an advisory capacity.

Cory's Thornless Blackberry

Loquat

Fruit Specialties

Blackberries... Crandall's Early. This is by far the best bush variety. Grows on erect stiff canes, and no trellis is required. Earliest to ripen and has a long fruiting season, berries firm, rich black color, juicy and delicious. The best for canning, jellies and jams. 15c per dozen.

Blackberries. Thornless Mammoth. (Cory.)

This is the best climbing blackberry ever produced, but it can also be grown as a bush by cutting back. The plant is thornless and makes picking easy. The berry is very large and of best flavor. Color deep maroon to black. Few seeds. Strongest grower, often producing canes from twenty to twenty-five feet in a single season. 50c each.

Loquats (Eriobotrya Japonica). A fruit and ornamental tree, large clusters of golden yellow fruit with large shiny deep green leaves. Acidulous aromatic flavor. Excellent for sauces, jellies, also for dessert. Ripens February to June. 15c, 25c, 50c, 75c, \$1.00.

LANDSCAPE PLANNING

IN ADDITION to our nursery business we also do landscape planting and designing, supplying experienced men for the work. Nothing can be more unsatisfactory than a jumble of growing stuff around the home, when the surroundings can be made beautiful and harmonious by working to an intelligent plan. This service is at the disposal of patrons. Estimates, plans, and advice on the selection of suitable trees, shrubs and plants will be cheerfully furnished intending planters.

The Kavan Nurseries

1423-29 Arrowhead Avenue
